Project Name	Importing & Securing Employee Training Data in ServiceNow
Maximum Marks	2 Marks

Data Flow Diagram

Shows how Excel training data, employee references, user requests, roles and training records move through the ServiceNow import and ACL process.

External Source **Excel File** **Training Name** **Completion Date** **Status** **Employee**	**1. Load Data** **System Import Sets** **Upload Excel file** **Create Employee Training import set**	**2. Transform** **Transform Map** **Map source fields to target fields** **Resolve Employee reference**	**Employee Training** **ServiceNow custom table** **Training records stored**
User / Authorized Staff **Login and open Employee Training**	**3. Employee Relationship** **Employee reference** **Dot-walk to Department**	**4. ACL Evaluation** **Check user role + operation** **Allow / deny**	**Access Result** **View or edit when permitted** **Restrict unauthorized access**

Flow: Excel File → Load Data / Import Set → Transform Map → Employee Training table → Employee reference / Department dot-walking → ACL evaluation → Allow or deny access.

DFD legend: External Source/User = source or actor | Numbered box = process | Employee Training table = data store | Arrows/flow text = data movement.
