Technology Stack

Date	29 September 2026
Team ID	SWTID-2026-6221
Project Name	Importing & Securing Employee Training Data in ServiceNow
Maximum Marks	2 Marks

Define Your Technology Stack:

The project is implemented primarily within the ServiceNow platform. The selected technologies support data import, employee reference relationships, dot-walking, role management, ACL configuration, testing, and administration of the Employee Training table.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	ServiceNow Platform UI / Forms & Lists	Provides the interface for administrators and authorized users to access Employee Training forms, lists and ACL-controlled actions.
2	Backend / Server-Side	ServiceNow Server-Side JavaScript / Glide APIs	Supports ServiceNow server-side security logic, ACL configuration and record access evaluation.
3	Database / Data Storage	ServiceNow Platform Database / Custom Table	Stores Employee Training records and fields such as Training Name, Completion Date, Status and Employee.
4	Cloud / Hosting / Deployment	ServiceNow Instance	The table, import configuration, roles and ACLs run within the ServiceNow instance without separate application hosting.
5	Version Control & CI/CD	ServiceNow Update Sets	Update Sets can capture configuration changes such as tables, fields, roles, ACLs and related customizations for controlled movement between instances.
6	Third-Party APIs / Other Tools	ServiceNow Import Sets, Transform Maps, ACL, Impersonation & Security Admin tools	Import Sets and Transform Maps load Excel data; ACLs, security_admin elevation and impersonation implement and verify role-based access.
