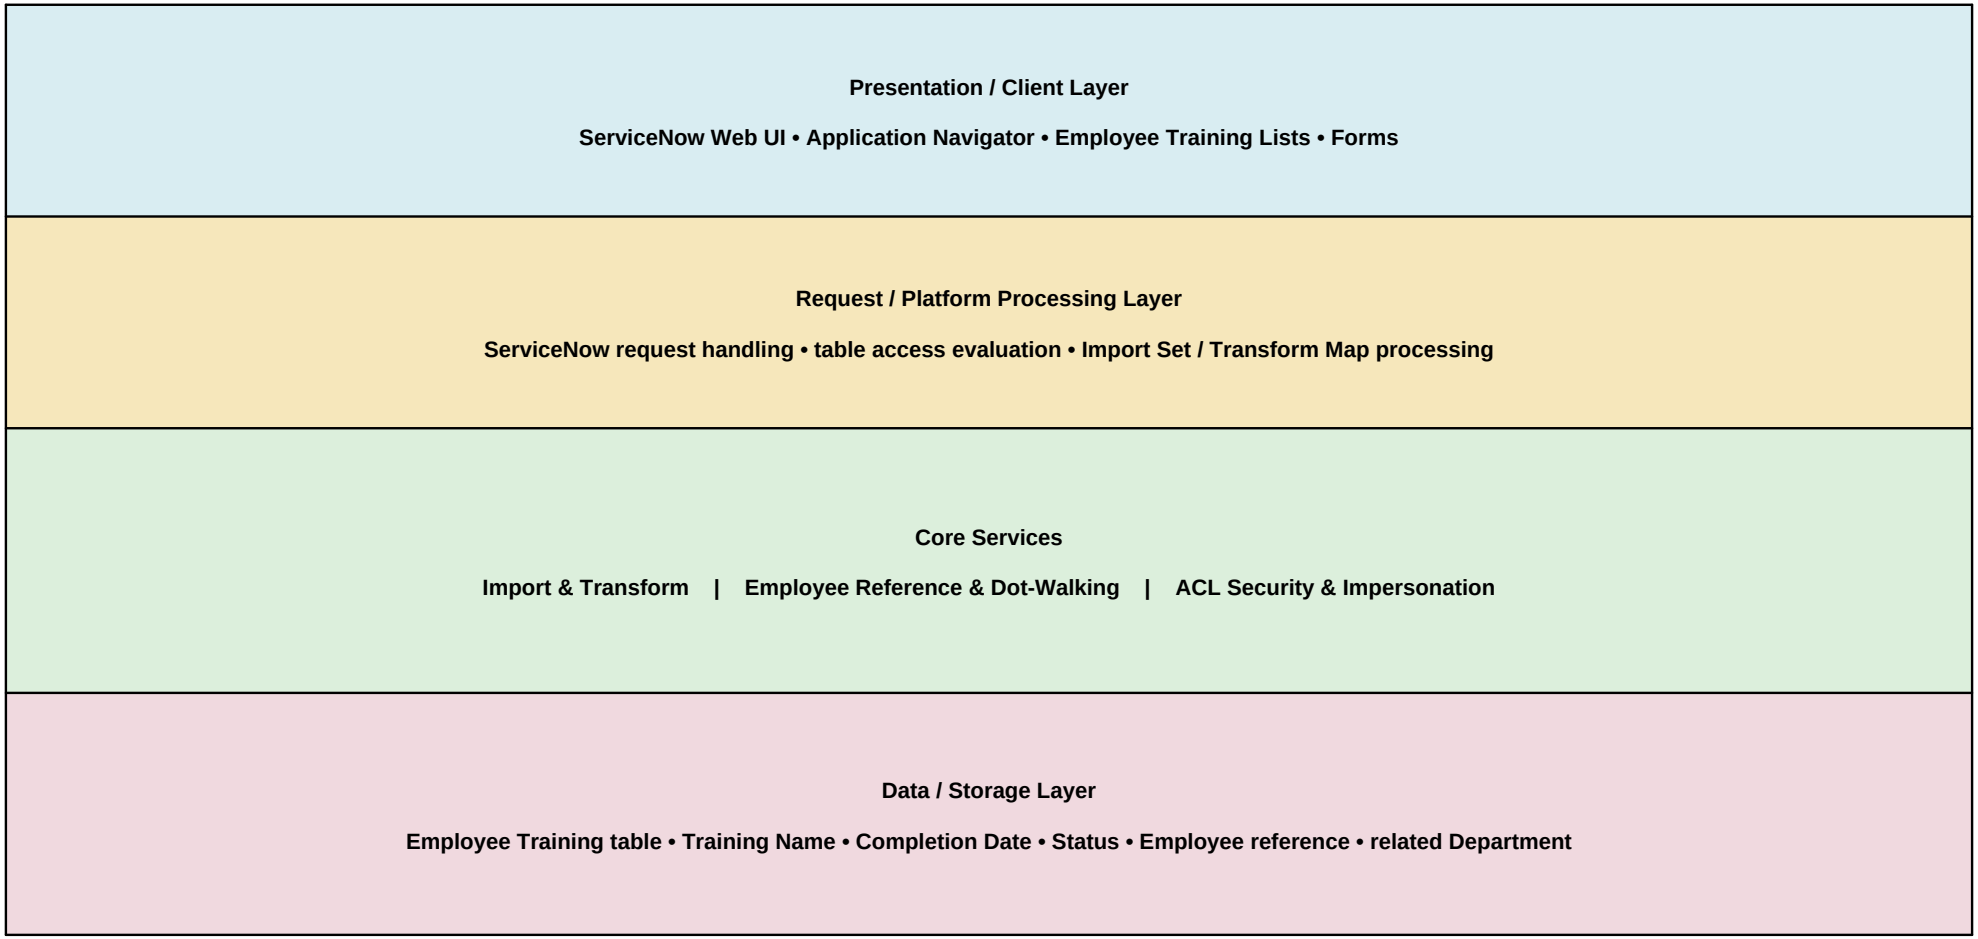
Solution Architecture

Date	29 September 2026
Team ID	SWTID-2026-6221
Project Name	Importing & Securing Employee Training Data in ServiceNow
Maximum Marks	5 Marks

Solution Architecture Diagram:

High-level representation of the ServiceNow presentation, import/access-control, application and data layers for the Employee Training solution.



Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation / Client	Provides forms, lists and navigation for administrators and authorized users to work with Employee Training records.	ServiceNow Platform UI, Forms, Lists, Application Navigator
Import Layer	Accepts spreadsheet data and prepares it for loading into the target table.	System Import Sets, Load Data
Transformation Layer	Maps source Excel columns to Employee Training fields and performs the import.	Transform Maps
Employee Relationship	Stores the employee as a reference and enables related information such as Department through dot-walking.	Reference field, sys_user, dot-walking
Security Layer	Controls who can read or write Employee Training records and validates permissions during testing.	Roles, ACLs, security_admin, impersonation
Data / Storage	Stores Training Name, Completion Date, Status and Employee relationship data.	ServiceNow custom table / platform database
