No. of Functional Features Included in the Solution

	29 September 2026
	SWTID-2026-6221
	Importing & Securing Employee Training Data in ServiceNow
	5 Marks

Functional Features Overview:

This document lists the functional features included in the Employee Training ServiceNow solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status	Marks Contribution
1	Employee Training Table	Custom table for storing employee training information.	Custom Table	Done	Core
2	Training Data Fields	Stores Training Name, Completion Date, Status and Employee.	Table Columns	Done	Core
3	Excel Data Import	Loads training data from an Excel spreadsheet into ServiceNow.	System Import Sets	Done	Core
4	Field Mapping	Maps imported source fields to the Employee Training target fields.	Transform Map	Done	Core
5	Employee Reference	Links each training record to a ServiceNow employee/user record.	Reference Field	Done	Core
6	Department Dot-Walking	Allows related Department information to be accessed through the Employee reference.	Form/List Configuration	Done	Reporting
7	Role-Based Access	Provides an HR Manager role with controlled access to Employee Training records.	Roles + ACLs	Done	Security
8	Impersonation Testing	Tests authorized and unauthorized user access and verifies Read/Write behavior.	ServiceNow Administration	Done	Security

Feature Summary:

Metric	Count / Value
d	8
ented	8
tures	6
ve Features	2
rified	8 — through the documented configuration and impersonation testing workflow

Feature Category Breakdown:

Category	Features in Category	Example Features
erface (UI)	2	Employee Training forms/lists; Configure Form Layout; list view access
d / Logic	3	Import Set processing; Transform Map; dot-walking
se / Storage	1	Employee Training custom table and fields
egration	0	No external API is specified in the project content
/ Authentication	2	HR Manager role; Read/Write ACLs and impersonation testing
